Shipping Solutions upgrades best-selling export documentation and compliance software

12/13/2004 1:27:00 PM
Shipping Solutions

EAGAN, MN – November 19, 2004 – Shipping Solutions announces version 7.1 of its best-selling software, Shipping Solutions Professional. This easy-to-use export software guides novice and experienced exporters as they complete and print export forms, file their shipments electronically with the U.S. Census Bureau and Customs, and screen all their exports against the Export Administration Regulations to prevent illegal exports that could generate government penalties.

Shipping Solutions Professional version 7.1 adds a new consolidation utility that allows exporters to combine several customer orders into a single set of shipping documents, includes the new U.S.-Chile Free Trade Agreement Certificate of Origin to its list of more than two dozen export forms, and adds the option to email the export forms in the Adobe Acrobat PDF file format.

"We've become the number one selling export software by listening to and meeting the needs of the small and medium-sized U.S. companies that represent 97% of all U.S. exporters," said David Noah, President of Shipping Solutions. "There are a number of really expensive export software choices for the huge corporations. Shipping Solutions represents an affordable and powerful choice for everyone else."

Shipping Solutions Professional is available for \$1,499 for a single-user license, while a network version – that includes a license to install the software on up to four workstations – is available for \$3,999. Both versions of Shipping Solutions Professional include a one-year subscription to the Annual Maintenance Program (AMP) that provides users with free updates of the software, access to the Export Compliance Module, and toll-free technical support.

Shipping Solutions Professional users who are current subscribers to the AMP will receive the upgrade to version 7.1 free of charge. Users who've let their AMP subscription lapse can upgrade for only \$500 for a single-user license and only \$1,250 for the network version.

About Shipping Solutions

Upon its release in 1996, Shipping Solutions quickly became the best-selling export documentation software. Thousands of exporters use Shipping Solutions to prepare export forms up to 80 percent faster than before and at a considerable cost savings. Shipping Solutions' customers range from small and medium-sized companies, which make up the largest percentage of companies that export, to large firms such as Advanced Micro Devices (AMD), Dell Computers, Siemens International and UPS Supply Chain Logistics. For more information on system requirements and other information, please visit <http://www.shipsolutions.com>.

Shipping Solutions is a registered trademark and the Shipping Solutions logo is a trademark of InterMart, Inc.
